## BESCHREIBUNG

With a lifespan of 20,000 hours (well beyond the standards you will find on the market), the bulb can last over 15 years (with 3 hours of daily use). Produces 3650 lumens of instant brightness, without having to wait for the bulb to warm up. Opalized diffuser that makes the light very homogeneous and not dazzling. The effect is very similar to old incandescent bulbs. The "LED filament" technology gives a hyper-diffused beam at 330°. With a color temperature of 4000 Kelvin, the bulb provides natural white light, creating a bright atmosphere in any room. Perfect for all rooms in the house such as the bedroom, living room, bathroom... and for the office. Ideal for bedside lamps, hoods, study lights, chandeliers, wall lamps.... It consumes 22 watts of energy and has an operating cost of less than 2.50 euros per year and allows significant energy savings compared to an incandescent light bulb. Equivalent to a traditional 2100W light bulb. High color rendering index (CRI > 80) provides natural and vivid color. This bulb is not dimmable, not compatible with dimmers.
