DESCRIPTION

With a lifespan of 20,000 hours (well beyond the standards you will find on the market), the bulb can last over 15 years (with 3 hours of daily use). It produces 1521 lumens of instant brightness, without having to wait for the bulb to warm up. The transparent diffuser makes the light very similar to old incandescent bulbs. The "LED filament" technology provides a hyper-diffused 330° beam. With a color temperature of 3000 Kelvin, the bulb provides warm white light, creating a comfortable atmosphere in any room. Perfect for any room in the home, such as the bedroom, living room, bathroom, and office. Ideal for bedside lamps, range hood lamps, study lights, chandeliers, and wall lamps. Energy efficiency class A light bulb: the highest level of energy saving and efficiency. It consumes 7 watts of energy and costs less than €2.50 per year, allowing for significant energy savings compared to an incandescent light bulb. Equivalent to a traditional 100W light bulb. The high color rendering index (CRI > 80) offers natural, vivid colors. This bulb is not dimmable and not compatible with dimmer switches.
