DESCRIPTION

The bulb is equipped with a twilight sensor: it turns on automatically as soon as darkness falls and turns off automatically when daylight arrives. Very convenient for automatically managing on and off times! It also offers significant energy savings. With a lifespan of 20,000 hours (well beyond the standards you'll find on the market), the bulb can last over 15 years (with 3 hours of daily use). It produces 820 lumens of instant brightness, without having to wait for the bulb to warm up. The opalized diffuser makes the light uniform, glare-free, and well-diffused (200° beam angle). With a color temperature of 4000 Kelvin, the bulb provides natural white light, creating a bright atmosphere in any room. Perfect for any room in the home, such as the bedroom, living room, bathroom, and office. It consumes 9 watts of energy and costs less than €2.50 per year to operate, offering significant energy savings compared to an incandescent light bulb. It's equivalent to a traditional 60W light bulb. The high color rendering index (CRI > 80) offers natural, vivid colors. This bulb is not dimmable and not compatible with dimmer switches.
