DESCRIPTION

With a lifespan of 20,000 hours (well beyond the standards you will find on the market), the bulb can last over 15 years (with 3 hours of daily use). Produces 806 lumens of instant brightness, without having to wait for the bulb to warm up. Transparent diffuser that makes the light very similar to old incandescent bulbs. The "LED filament" technology gives a hyper-diffused 330° beam. With a color temperature of 2700 Kelvin, the bulb provides warm white light, creating a comfortable atmosphere in any room. Perfect for all rooms in the house such as the bedroom, living room, bathroom... and for the office. Ideal for bedside lamps, hoods, study lights, chandeliers, wall lamps.... It consumes 6 watts of energy and has an operating cost of less than 2.50 euros per year and allows significant energy savings compared to an incandescent light bulb. Equivalent to a traditional 60W light bulb. High color rendering index (CRI > 80) provides natural and vivid color. This bulb is not dimmable, not compatible with dimmers.
