DESCRIPTION

The fiberglass cable probe is an extremely professional tool. A variety of accessories and spare parts are available for all versions, including: tips, flexible tips, shackle, sliding wheel, swivel joint, repair connectors, two-component repair glue, horizontal reel winders and vertical wheeled reels. Suitable for rapid insertion into long-distance pipelines, the use of a reel is recommended to protect the probe and the operator. Advantages: extreme introductory capacity, self-energetic. German plastic, Made in Italy product.
