## DESCRIPTION

Solar LED wall light made of plastic; contemporary and elegant design; shock and weather resistant; the electronics are particularly waterproof. Operation: The light automatically turns on at sunset at 20% power (approximately 40 lumens). As soon as motion is detected in the area covered by the detector, the light will turn on at 100% power (approximately 200 lumens). The light therefore functions as both a courtesy light and a security light. It charges during the day and works at night: it does everything by itself. Equipped with a 1.6w monocrystalline solar panel and 1200mAh Li-Ion battery. Perfect for use in the garden, on the terrace, on the balcony... the important thing is that it receives maximum direct sunlight to give you maximum autonomy during the night.
