DESCRIPTION

The cable gland is a long, flexible fiber optic cable with a tensioning eyelet on one end and a blind end on the other. It's used to thread electrical cables into corrugated pipes. Nylon cable pulling probe, white, Ø 3 mm, 30 metres, with fixed terminals. The Ø 3 mm nylon probe is suitable for electrical system installations in residential applications and is ideal for short, winding sections. Advantages: cost-effectiveness, ease of use and high flexibility. German plastic, Made in Italy product.
