DESCRIPTION

The cable gland is a long, flexible fiber cable with a tensioning eyelet at one end and a flexible, elastic head at the other. It is used to thread electrical cables into corrugated pipes. Nylon cable pulling probe, black, Ø 4 mm, 30 meters, with interchangeable terminals The 4 mm diameter nylon probe is suitable for residential electrical installations and is ideal for short, winding sections. The interchangeable brass fittings are threaded directly onto the nylon; with a high breaking load, they are practical and easy to replace. Advantages: cost-effectiveness, ease of use and high flexibility. German plastic, Made in Italy product.
